## **DETAILED ACTION**

### ***Specification***

The disclosure is objected to because of the following informalities:

a) The recitation in the first line of the abstract "DMT" is improper because this acronym has not been introduced previously; it is suggested to be changed to "Discrete Multitone Modulation (DMT)".

b) The recitation in page 4 line 1 "128and the" is improper because it is not properly constructed; it is suggested to be changed to "128 and the".

c) The recitation in page 6 line 18 "1/1 92" is improper because it is not properly constructed; it is suggested to be changed to "1/192".

d) The recitation in page 7 line 5 "G.992.1 and T1.413" is improper because it is not properly constructed; it is suggested to be changed to "G.992.1 and T1.413" (emphasis added).

e) The recitation in page 7 lines 8-10 "Bit Swapping is specified in the ITU and ANSI standards as method for modifying the number of bits allocated to a particular" is improper because it is not properly constructed; it is suggested to be changed to "Bit Swapping is specified in the ITU and ANSI standards as method for modifying the number of bits allocated to a particular carrier" (emphasis added).

Appropriate correction is required.

### ***Double Patenting***

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or

Art Unit: 2611

discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claim 1 is rejected under 35 U.S.C. 101 as claiming the same invention as that of claim 1 of prior U.S. Patent No. 6,667,991 B1. This is a double patenting rejection.
